⁺ Specific Off-Label Approval (SOLA) required.

Use plant protection products safely. Always read the label and product information before use

Dove Associates shall in no event be liable for any loss or damage caused by the use of products mentioned in this document

© Dove Associates 04/07/11

Avoid using products as successive treatments with the same FRAC codes e.g. Amistar, Galileo, Signum, Strobby WG and Swift SC. Repeated use of pesticides with the same mode of action increases the risk of resistance being formed by pests/diseases.

Under the replacement of the Long-Term Arrangements for Extension of Use the following now applies:

- Attenzo, Frupica SC, Talius and Torch Extra are no longer approved for use in ornamental plant production but can be used in forest nurseries with a SOLA.
- Corbel and Folicur are still being assessed by CRD for use in ornamental plant production.

Go to www.pesticides.gov.uk to download the SOLAs or contact the office for copies.
