Avoid using products as successive treatments with the same FRAC codes e.g. Amistar, Signum, Stroby WG, Swift SC and Vivid. Repeated use of pesticides with the same mode of action increases the risk of resistance.

The Long-Term Arrangements for Extension of Use are being replaced. Amistar, Bravo 500, Bumper 250EC, Signum, Stroby WG, Swift SC and Vivid require a Specific Off-Label Approval (SOLA) for use in ornamental plant production. Go to www.pesticides.gov.uk to download the information or contact the office for more details.

Caramba, Lyric, Cuprokyt FL, Dithane 945 and Folicur are still being assessed by CRD.

Fandango can only be used on forest nurseries and requires a SOLA.

Use plant protection products safely. Always read the label and product information before use

Dove Associates shall in no event be liable for any loss or damage caused by the use of products mentioned in this document
